C. Non-Mandatory Practice**Stand Conditions, Special Features or Characteristics****Stand Number: P 19**

FROM ADDITION: Very small amount of white pine sawlogs and oak saplings. Attempt cutting in late summer early fall to create mineral soil to promote white pine and oak regeneration. 2022 harvest should open up areas where white pine and oak are regeneration. Patch selection used to facilitate removing red pine pocket decline areas.

Stand Number: 20

FROM ADDITION: Area was typed Central Hardwoods because no individual tree species is greater than 50% of the stocking in the stand.

Stand Number: 21
